

Independent Verification and Validation (IV&V) Services

Areeva Solutions, LLC delivers industry-leading IV&V services powered by a team with over 25 years of proven expertise. Our professionals bring deep industry insights, top-tier consulting experience, and a track record of successfully managing and overseeing large-scale programs across federal and commercial sectors.

Financial Management

- Oversee financial planning processes, including budget preparation, forecasting, mid-year adjustments, and depreciation and capital expenditures management.
- Develop and deliver insightful financial reporting and analysis to ensure an accurate business overview and enable data-driven decisions, focusing on cash flow, revenue, expenses, obligations, allowances, accounts receivable, KPI dashboards, and project reporting.
- Provide strategic guidance and leadership to team members who contribute to financial activities.
- Review and validate contractor and agency reports, ensuring accuracy in monthly billings, and manage Interagency Agreement (IAA) revenue and accounts receivable tracking.
- Lead and provide oversight for daily accounting operations and month-end close processes.
- Conduct ad hoc financial analysis and modeling to support business needs.

- Evaluate and validate the opportunity pipeline to ensure accurate revenue forecasting.
- Analyze pricing and estimating models, assess methodologies, and review proposals for financial accuracy, soundness, and risk mitigation.
- Lead and present Monthly Program Health Reviews to assess program performance and the status of individual projects.
- Facilitate weekly technical status meetings to manage SDLC progress and release planning for the Grant Solutions product suite (10+ products).
- Monitor and maintain partner relationships by conducting bi-weekly “Partner Health Check” meetings.
- Coordinate Program Council and Program Strategy Meetings as needed to drive program direction, address long-term priorities, and resolve client concerns requiring cross-departmental input.

Project & Program Management (PMO)

Risk Management

- Proactively identify financial challenges and project risks, providing the government with solutions and driving resolution efforts.
- Conduct regular briefings for the federal team on financial health, emphasizing critical issues and strategic business insights.

- Identify process implementation or improvement opportunities and collaborate with team members to develop, document, and execute effective solutions.

Business Controls

Federal Funds Management

- Oversee budget and forecast development for the five-year contract period.
- Manage Services and Supply Fund (SSF) funding requests and prepare financial projections.
- Track and analyze actual performance against budget and forecast, providing regular reporting.

- Advise on IAA and Technical Assistance (TA) financial terms and conditions, highlighting potential financial risk factors.
- Analyze contract agreements to evaluate their implications for financial plans and forecasts.
